Attorneys for Defendants
State of California by and through California
Highway Patrol and Officer Ramon Silva

UNITED STATES DISTRICT COURT
CENTRAL DISTRICT OF CALIFORNIA

SANDRA KIRKMAN AND
CARLOS ALANIZ,
INDIVIDUALLY AND AS
SUCCESSORS-IN-INTEREST TO
JOHN ALANIZ, DECEASED,

Plaintiff,

v.

STATE OF CALIFORNIA;
RAMON SILVA; AND DOES 1-10,
INCLUSIVE,

Defendant.

Case No.: 2:23-cv-07532-DMG-SSC

**DECLARATION OF LEE H.
ROISTACHER IN SUPPORT OF
REPLY OF DEFENDANTS STATE
OF CALIFORNIA BY AND
THROUGH CALIFORNIA
HIGHWAY PATROL AND
OFFICER RAMON SILVA TO
PLAINTIFFS' OPPOSITION TO
MOTION FOR SUMMARY
JUDGMENT**

Date: February 28, 2025
Time: 2:00 p.m.
Courtroom: 8C
Judge: Hon. Dolly M. Gee

Complaint Filed: July 28, 2023
Trial Date: April 15, 2025

I, Lee H. Roistacher, hereby declare as follows:

1. I am an attorney licensed to practice law in the State of California. I am also a partner in the law firm of Dean Gazzo Roistacher, LLP, attorneys of record for defendants State of California by and through California Highway Patrol and Officer Ramon Silva in this matter. I have personal knowledge of the following facts, and if called to testify with respect thereto, would do so competently.

///

1 2. Attached as exhibit 38 are true and correct copies of excerpts from
2 the deposition of Ramon Silva, page 6:22-24.

3 10. Attached as exhibit 39 is a true and correct copy of the Autopsy
4 Report of John Alaniz dated May 6, 2022.

5 11. Attached as exhibit 40 is a true and correct copy of the Rule 26
6 report by plaintiffs' expert Bennet Omalu.

7 I declare under penalty of perjury under the laws of the United States of
8 America that the foregoing is true and correct.

9 Executed on January 24, 2025.

25 Work Order: 51529

1 any time before that, just let me know and we'll take a break
2 at that time.

3 Okay?

4 A. Sounds good, sir.

5 Q. Have you reviewed any documents, videos, statements,
6 anything like that in preparation for the deposition?

7 A. Yes.

8 Q. Can you please tell me what you reviewed?

9 A. I reviewed my body cam; I reviewed my statements to
10 the CHP SIT Team, and then I reviewed my statement to the DOJ
11 investigators, and other documents regarding training that
12 Ms. Reyes had sent over.

13 But that's basically it.

14 Q. Let me just follow up on a little bit of that.

15 Your body cam, was that your personal body cam at
16 the time?

17 A. Yes, sir.

18 Q. And have you ever watched the body cam like in a
19 slowed-down fashion?

20 A. I'm sure I have that I can explicitly remember
21 now.

22 Q. And how about still shots, have you ever been
23 provided with any still shots of the body-worn camera?

24 A. No, sir.

25 Q. And do you have an estimate?

CERTIFICATE

OF

CERTIFIED STENOGRAPHIC SHORTHAND REPORTER

I, JINNA GRACE KIM, CSR No. 14151, a Certified
Stenographic Shorthand Reporter of the State of California,
do hereby certify:

That the foregoing proceedings were taken before me
at the time and place herein set forth;

That any witnesses in the foregoing proceedings,
prior to testifying, were placed under oath;

That a verbatim record of the proceedings was made
by me, using machine shorthand, which was thereafter
transcribed under my direction;

Further, that the foregoing is an accurate
transcription thereof.

I further certify that I am neither financially
interested in the action, nor a relative or employee of any
attorney of any of the parties.

IN WITNESS WHEREOF, I have subscribed my name, this
date: March 6, 2024.

A handwritten signature in black ink, appearing to read 'Jinna Grace Kim', is written over a horizontal line.

2022-04841

ALANIZ, JOHN JOSEPH

Page 4Gunshot wound #1, Chest, Imminently fatal (GSW A and P2of2):

Entrance (GSW A): On the right upper chest 12-3/4 inches from top of head, 8 inches to top of table with body in supine position, and 6 inches right of the anterior midline is an ovoid 1/2 x 1/4 inch diameter gunshot wound. There is no marginal abrasion, and the edges of the wound are smooth. Soot, unburned gunpowder particles, and stippling are not visible on the skin surrounding the wound.

Recovery (P 2of2): A copper and gray colored projectile is recovered from the left lung lower lobe at the time of examination and submitted as evidence.

Exit: None.

Path: The projectile sequentially perforates skin, soft tissue, the anterior chest wall through the right anterior rib 3, the right lung upper lobe, pericardium, aorta, pulmonary arteries, esophagus, the anterior surface of the T7 vertebral body, and then becomes embedded in the left lung lower lobe.

Associated injuries:

1. Bilateral hemothorax; at least 250 cc on the right and 200 cc on the left

Direction: The projectile travels from his right to left, front to back and downward

Range of fire: The range of fire is indeterminate.

Gunshot wound #2, Right leg (GSW B and P1of2):

Entrance (GSW B): On the right anterior thigh 38-1/2 inches from top of head, 9-1/4 inches from top of table with body in supine position, and 1/8 inches right of the anterior limb midline is a irregular 1 x 7/8 inch diameter gunshot wound. There is an eccentric marginal abrasion from 9-4 o'clock measuring 1/16 to 3/16 inches in width, with a trailing abrasion at 11 o'clock measuring 1/2 x 3/16 inches. Just inferior to the wound is a purple-pink contusion and abrasion cluster measuring 1-1/4 x 3/4 inches in area with abrasions ranging from pinpoint up to 3/16

No.

2022-04841

ALANIZ, JOHN JOSEPH

Page 5

inches in width. Soot, unburned gunpowder particles, and stippling are not visible on the skin surrounding the wound.

Recovery (Plof2): A copper and gray colored projectile is recovered from right leg soft tissue 46 inches from top of head and 2 inches left of the anterior limb midline at the time of examination and submitted as evidence.

Exit: None.

Path: The projectile sequentially perforates skin and soft tissue before embedding in the soft tissue.

Direction: The projectile travels from right to left, front to back and down.

Range of fire: The range of fire is indeterminate.

Gunshot wound #3, left leg (GSW C):

Entrance/Exit (GSW C): On the left anterior shin 53 inches from top of head, 4-1/4 inches from top of table with body in supine position, and 1/2 inch right of the anterior limb midline is a ovoid $\frac{3}{4}$ x 1/4 inch diameter gunshot wound. There is an eccentric marginal abrasion from 2-3 o'clock measuring 1/16 inch in greatest width, with smooth edges that are focally dark purple and dry. Soot, unburned gunpowder particles, and stippling are not visible on the skin surrounding the wound.

Recovery: None. Note, given the shallow nature of the wound the projectile was likely dislodged prior to examination of the body.

Path: The projectile sequentially perforates skin and superficial soft tissue with the hemorrhagic wound tract ending just superior to the left tibia.

Direction: The projectile travels from front to back.

Range of fire: The range of fire is indeterminate.

No.

2022-04841

ALANIZ, JOHN JOSEPH

Page 13

SUMMARY & OPINION:

This 34-year-old man's death is attributed to multiple gunshot wounds.

At examination, he is found to have a total of 3 gunshot wounds with an imminently fatal gunshot wound of the chest that disrupts the aorta, pulmonary arteries, both lungs, and esophagus with associated bilateral hemothorax of at least 450 cc total. A total of two projectiles are recovered from within the body, and a projectile consistent with an electronic control device barb is recovered from the clothing. The range of fire for all of the gunshot wounds is indeterminate. Blunt force trauma, including lacerations of the posterior scalp are identified, though no fatal blunt force trauma is found. Possible puncture marks are identified on the upper extremities, but in the setting of medical intervention no definite evidence of the electronic control device contacting the skin is evident. Toxicology studies demonstrate the presence of cannabinoids in the chest blood.

For the purpose of public health and vital statistics, given the history and circumstances as currently known by me in the setting of the findings by examination and ancillary studies, the manner of death is classified as homicide.

Julie Huss-Bawab, M.D.

January 13, 2025

Dear Mr. Galipo,

**Re: John Joseph Alaniz, Deceased
Medico-Legal Report**

Summary of Education, Training and Experience

I completed medical school in 1990 at the University of Nigeria, Enugu, Nigeria. Upon graduating from medical school, I completed a one-year clinical housemanship at the University of Nigeria Teaching Hospital in the fields of Pediatrics, Internal Medicine, General Surgery, Obstetrics, and Gynecology. After housemanship, I worked as an emergency room physician at a university hospital in Nigeria for approximately three years. I sat for and passed my United States Medical Licensing Examinations [USMLE] while I worked as an emergency room physician. I came to the United States in 1994 through a World Health Organization scholarship to become a visiting research scholar for eight months at the Department of Epidemiology, Graduate School of Public Health, University of Washington, Seattle, Washington.

In 1995, I proceeded to the College of Physicians and Surgeons of Columbia University, New York, at Harlem Hospital Center, to complete residency training in Anatomic Pathology and Clinical Pathology. In 1999 I proceeded to the University of Pittsburgh, Pittsburgh, Pennsylvania to complete residency training in Forensic Pathology and Neuropathology. I hold four board-certifications in Anatomic Pathology, Clinical Pathology, Forensic Pathology and Neuropathology. I also hold a Masters in Public Health [MPH] degree in Epidemiology from the Graduate School of Public Health, University of Pittsburgh, Pittsburgh, Pennsylvania. I also hold a Masters in Business Administration [MBA] degree from the Tepper School of Business, Carnegie Mellon University, Pittsburgh, Pennsylvania, one of the leading business schools in the world. I am a Certified Physician Executive and an Honorary Fellow of the American Association of Physician Leadership [AAPL]. I also hold a fifth board-certification in Medical Management from the AAPL. I am currently licensed to practice Medicine and Surgery in the State of California.

I am currently the President and Medical Director of Bennet Omalu Pathology [BOP], a California medico-legal consulting firm, and a Clinical Professor at the Department of Medical

Pathology and Laboratory Medicine, University of California, Davis. In my capacity as the Medical Director of BOP, I am a consulting Forensic Pathologist and Neuropathologist to many hospitals in central California and to several counties in northern California. There are less than a few dozen practicing Forensic Pathologists-Neuropathologists in the United States who are board-certified in both Forensic Pathology and Neuropathology.

For over twenty years, I have been involved in over thirteen death and injury investigations in my career as a Forensic Pathologist and Neuropathologist, which began in 1999. I have personally conducted and performed over twelve thousand autopsies and death investigations and examined over thirteen thousand brain tissue specimens. I also perform trauma pattern analysis in both living patients and deceased patients to determine causes and mechanisms of sustenance of injuries and death. I am also involved in the evaluation of living victims of all types of injuries and trauma, including but not limited to victims of assault, traumatic falls, industrial and accidental injuries, medical complications and misadventures, rape, child abuse and sports-related injuries. I have been consulted and retained as an expert witness in two to three thousand cases involving all types of medico-legal cases across all jurisdictions in the United States including federal, state, county and municipal courts and arbitration panels; in both civil and criminal cases, for the plaintiff, defense, district attorneys and public defenders. I have been involved as an expert witness in complex class action and industrial lawsuits involving thousands of individuals and major corporations.

My areas of interest and focus include brain patho-physiology, brain injuries and brain trauma, in both living and deceased patients. I identified Chronic Traumatic Encephalopathy [CTE] in a retired football player when I performed an autopsy and examined the brain of Mike Webster in 2002. Subsequently, I identified CTE in other high-impact, high-contact sports athletes and in military veterans suffering from Post-Traumatic Stress Disorder [PTSD]. Since 2002 CTE has received international attention from the sports industry, sports medicine, and neuroscience. My work has been featured extensively in all media platforms across the world. My work and life were featured in a major Hollywood film, "Concussion" released in December 2015 by Sony Motion Pictures, in which the renowned actor, Will Smith, played me as Dr. Omalu. Several New York Times best-selling books have also been published on my life and work including "The League of Denial" and "Concussion." I have published several books including my memoir, "Truth Doesn't Have a Side," which was published in August 2017. My latest book, "Brain Damage in Contact Sports" was published in February 2018. I have published extensively in the medical and scientific literature, authoring many scientific papers and book chapters.

I have received three honorary PhD degrees from two universities in the United States, and from the Royal College of Surgeons of Ireland in recognition of my work and expertise. I have also received numerous awards from across the world in recognition for my work and expertise in both living and deceased patients. I have received the "Distinguished Service Award" from the American Medical Association [AMA], which is the most prestigious award of the AMA. I have been honored by the United States Congress and I have appeared on multiple occasions before committees of the United States Congress and committees of State Legislatures across the United States advising them on matters relating to trauma. In 2019 and 2020 I was appointed to the Traumatic Brain Injury Board of the State of California to advise the state on matters relating to traumatic brain injuries.

Since 1999 I have testified as an expert witness in matters relating to all types of injuries and deaths in over 600 court proceedings across the United States. I have attached a copy of my curriculum vitae [CV] as Appendix A. My CV enumerates my body of work and experience in

greater detail. The cases I have testified in, beginning in 2009, are enumerated at the end of my CV.

Pursuant upon your request, I have reviewed the following materials sent to me on the case of John Joseph Alaniz, Deceased:

1. Complaint for damages
2. Certificate of death
3. Autopsy report
4. Autopsy photographs
5. Scene photographs
6. Los Angeles Fire Department report
7. St Francis Medical Center medical records
8. California Highway Patrol emergency medical report
9. McCormick Ambulance Service report
10. Los Angeles Medical Examiner evidence log
11. Axon body video clip

In order to perform and apply a valid differential diagnosis method including but not limited to causation criteria¹ analysis, Central Limit Theorem analysis and Clinico-Pathologic Correlation analysis, on this case, I had to review, document, and analyze the materials sent to me on this case in considerable depth and detail. Such differential diagnosis and review formed the foundation for my case-specific and general causation opinions in this case.

Brief Summary of Prevailing Forensic Scenario^{2,3}

At the time of his death on May 4, 2022, John Joseph Alaniz (John Alaniz) was a 34-year-old male who was born on January 25, 1988.

According to the Coroner Investigator's Narrative, on 05/04/2022, at approximately 11:19 a.m., John Alaniz was walking on the 105 freeway into the right-hand lane of traffic when he was struck by a truck. He got up and ran through lanes of traffic and was struck a second time by a pickup truck.

California Highway Patrol (CHP) officers were dispatched to the scene and on arrival at approximately 11:32 a.m., John Alaniz started walking towards them and the officers deployed a Taser while another officer opened fire and shot him five times. John Alaniz was unarmed.

Officers administered a cycle of cardiopulmonary resuscitation (CPR) before paramedics of the Los Angeles County Fire Department arrived at the patient side at about 11:35:12 a.m. Mr. Alaniz was found lying supine on the freeway in severe distress. At 11:38 a.m. his heart rate was 117, respiratory rate was 6. At 11:40:53 a.m. his Glasgow Coma Scale (GCS) was 3/15. EKG

¹ Hill, AB. The Environment and Disease: Association or Causation? Proc R Soc Med. 1965 May;58(5):295-300. PMID: 14283879; PMCID: PMC1898525. [These are causation criteria that long existed prior to Sir Hill for the purposes of differential diagnosis. However, he summarized some of them in a speech that he gave in 1965. Since then, some of these criteria applied to the method of differential diagnosis became known as the Bradford Hill criteria. However, they existed and were in use prior to Sir Hill's speech].

² This section of the report should not be used to establish the facts in this case and is not intended to be used to establish the facts in this case.

³ There is an accompanying video clip that, in part, documented the prevailing terminal forensic scenario.

showed pulseless electrical activity (PEA) at approximately 30 beats per minute. He received chest compressions and had an oropharyngeal airway placement and Bag-valve-mask (BVM) ventilation. Basic and advanced life support protocols were initiated.

At 11:33 a.m. paramedics of the McCormick Ambulance Service (MAS) also arrived at the patient side. His GCS was stated to be 3/15. John Alaniz was emergently transported to the St. Francis Medical Center. While en route there was no change in his condition. Medical records from the St. Francis Medical Center state that Mr. Alaniz arrived at the hospital at 11:59 a.m. Mr. Alaniz was brought in by ambulance in traumatic full arrest with CPR in progress. He was pulseless with no heart sounds, and unresponsive with fixed and nonreactive pupils. He had no recordable blood pressure and his respiratory rate was 0. Mr. Alaniz was intubated and had a left-sided thoracotomy and a right-sided chest tube placement without any return of spontaneous circulation (ROSC). There was bloody output from the right chest tube and devastating injuries with cardiac tamponade and cardiac and ascending aorta injuries. Mr. Alaniz was pronounced dead at 12:08 p.m.

Autopsy:

A full autopsy was performed on the body of John Joseph Alaniz on May 6, 2022, at the Los Angeles Department of Medical Examiner-Coroner by Dr. Julie Huss-Bawab, Deputy Medical Examiner. The autopsy began at 08:30 a.m.. John Alaniz, a 34-year-old male died as a result of a Gunshot Wound of the Chest. The manner of his death was determined to be a homicide.

Dr. Huss-Bawab described the following evidence of trauma:

1. Gunshot Wound of the Chest [Bullet Recovered]^{Designated GSW #1 in the autopsy report}

There was an ovoid 1/2 x 1/4 inch entrance wound in the lateral rostral right chest located 12-3/4 inches from the top of the head, and 6 inches right of the anterior midline. There were 0.1 to 0.2 cm in width red-pink circumferential marginal abrasions without soot deposits or powder stippling.

The bullet perforated the skin and soft tissues of the anterior chest wall, perforated the right anterior 3rd rib, the upper lobe of the right lung, the pericardium, the aorta, the pulmonary arteries, the esophagus, the anterior T7 vertebral body and the lower lobe of the left lung where it came to settle. There were associated bilateral hemothoraces, at least 250 cc on the right and 200 cc on the left.

A copper and gray-colored projectile was recovered embedded in the lower lobe of the left lung.

The trajectory of the bullet was backward, downward and leftward.

2. Gunshot Wound of the Proximal Right Thigh [Bullet Recovered]^{Designated GSW #2 in the autopsy report}

There was a 1 x 7/8 inch irregular entrance wound in the lateral anterior proximal right thigh located 38-1/2 inches from the top of the head, and 1/8 inches right of the anterior limb midline. There were eccentric marginal abrasions in the superior margins of the wound, which measured from 1/16 to 3/16 inch in width from the 9 o'clock to 4 o'clock clockwise positions, and a 1/2 x 3/16 inch trailing abrasion at the 11 o'clock position. There were no soot deposits or powder

stippling. Just inferior to the wound was a 1-1/4 x 3/4 inch cluster of purple-pink abrasions and contusions, with the abrasions ranging from pinpoint up to 3/16 in width.

The bullet perforated the skin and soft tissues before it came to settle in the soft tissues of the right thigh.

A copper gray-colored projectile was recovered embedded in the soft tissues of the right thigh located 46 inches from the top of the head and 2 inches left of the anterior limb midline.

The trajectory of the bullet was backward, downward and leftward.

3. Gunshot Wound of the Left Leg^{Designated GSW #3 in the autopsy report}

There was an ovoid 3/4 x 1/4 inch gunshot entrance wound in the left anterior shin located 53 inches from the top of the head, and 1/2 inch right of the anterior limb midline. There was a 1/16 inch in greatest dimension circumferential marginal abrasion without any soot deposit or powder stippling⁴.

The bullet perforated the skin and superficial soft tissues with a hemorrhagic wound tract that ended just superior to the left tibia. According to the autopsy report, it appeared that the bullet fell off from the superficial track of the wound prior to the autopsy and was apparently not recovered during the autopsy.

The direction of the bullet was backward, downward and leftward⁵.

The following other trauma were also described in the autopsy report:

4. Blunt Force Trauma: Left Posterior Scalp Laceration Cluster

1. There was a 1-1/2 x 3/16 inch exposed soft tissue linear laceration
2. There was a 1/2 x 1/4 inch by 1/8 inch depth exposed soft tissue stellate laceration
3. There were associated 1 x 1-inch abrasions
4. There was a 7 x 5 cm area of subcutaneous and periosteal hemorrhages upon reflection of the scalp.

There was no associated fracture or internal hemorrhage.

5. Superficial Abrasions

1. There were multiple 1/8 x 1/8 to 1/2 x 3/8 inch superficial abrasions of the forehead
2. There was a 3/16 to 1/4 inch range cluster of superficial abrasions of the right ear
3. There was a 1/8 x 1/16 to 1/4 x 1/4 inch cluster of superficial abrasions of the left ear
4. There was a 1/16 to 1/2 inch cluster of superficial abrasions of the right cheek
5. There was a 3/8 x 1/4 inch superficial abrasion of the left cheek
6. There was a 1/8 x 1/2 inch cluster of superficial abrasions of the chin
7. There was a 3/4 x 1/4 inch superficial abrasion of the anterior neck

⁴ The autopsy report states that the marginal abrasion was eccentric, however the autopsy pictures show circumferential marginal abrasions.

⁵ The autopsy pictures show a backward, downward and leftward trajectory. The autopsy report states only a backward trajectory.

8. There was a $\frac{1}{2} \times \frac{1}{8}$ inch superficial abrasion of the right abdomen
9. There was a $\frac{1}{2} \times \frac{1}{2}$ inch superficial abrasion of the upper back
10. There was a $\frac{1}{16}$ -inch superficial abrasion of the right posterior shoulder
11. There was a $5\frac{1}{4} \times 1\frac{3}{4}$ inch superficial abrasion, with $1\frac{1}{4} \times \frac{1}{2}$ inch pink contusion of the left lower back located $33\text{--}35\frac{1}{4}$ inches proximal to the left heel
12. There was a $\frac{1}{4} \times \frac{1}{8}$ to $\frac{3}{4} \times \frac{3}{4}$ inch cluster of superficial abrasions of the right elbow.
13. There was a $\frac{1}{8}$ inch in diameter superficial abrasion of each right posterior 2nd and 3rd knuckles.
14. There were multiple proximal to distal 2×1 inch, $\frac{1}{2} \times \frac{1}{4}$ inch, and $\frac{3}{4} \times \frac{1}{2}$ inch superficial abrasions of the left posterior arm.
15. There were $\frac{1}{4} \times \frac{1}{4}$ and $\frac{1}{4} \times \frac{3}{16}$ inch cluster of superficial abrasions of the left posterior hand, 2nd and 3rd knuckles.
16. There was a $\frac{1}{8} \times \frac{1}{16}$ inch superficial abrasion of the right knee.
17. There were multiple superficial abrasions, each measuring approximately $\frac{3}{8}$ inch in diameter, of the left lateral ankle.

6. Contusions

1. There was a faint blue $4 \times 3\frac{1}{2}$ inch area of contusions of the left upper anterior shoulder.
2. There was a purple $2 \times 2\frac{1}{2}$ inch area of contusions of the right elbow
3. There was a purple $1\frac{1}{2} \times \frac{1}{2}$ inch area of contusions of the right posterior hand
4. There were multiple areas of $1\frac{1}{4} \times \frac{1}{4}$ inch to $1\frac{3}{4} \times \frac{1}{2}$ inch contusions of the right anterior hand wrist to palm.
5. There was a $\frac{1}{4} \times \frac{3}{8}$ inch purple contusion of the left posterior shoulder
6. There was a $5 \times 4\frac{1}{4}$ inch purple-black contusion of the left proximal posterior upper arm
7. There was a 3×2 inch faint purple contusion of the left posterior wrist
8. There was a $1 \times \frac{1}{4}$ inch purple contusion of the left posterior hand, 3rd knuckle
9. There were multiple $\frac{1}{2} \times \frac{1}{8}$ to $1\frac{1}{2} \times 1$ -inch contusions of the right leg, thigh to knee
10. There was a 3×2 inch faint blue contusion of the left mid-anterior thigh

The following other internal findings were described:

1. There were soft tissue hemorrhages in the anterior pelvic peritoneum.
2. There were soft tissue hemorrhages in the mesentery near the tail of the pancreas.

The brain weighed 1430 grams. The heart weighed 400 grams and the right and left lungs weighed 330 grams and 280 grams respectively and were dark red-purple. The liver weighed 1660 grams and was tan-brown. Serial sectioning of the coronary arteries showed minimal atherosclerosis. The brain was diffusely softened.

Medico-Legal Questions

1. What were the bullet wound characteristics and trajectories of the bullets of the gunshot wounds John Joseph Alaniz sustained, and what was his body positioning while he was being shot?

Medicine is a life science, which is evidence based. The practice of medicine is guided by established standards and generally accepted principles, which certified physicians must adhere to. The specialties and the categories of physicians who are proficiently trained, specialized, and competent in the accurate determination of the cause, mechanism and manner of death and the mechanisms of sustenance of lethal trauma are the forensic pathologists, especially for deaths involving all types of trauma and bodily injury. The death of John Alaniz involved serious bodily injury.

It is a generally accepted principle and common knowledge in medicine and forensic pathology, that specific traumatic events generate predictable, reproducible, and specific patterns of traumas and injuries. Applying the clinico-pathologic method of differential diagnosis, a specific documented pattern of trauma can be evaluated, translated, and applied to the determination of the mechanisms of generation, causation, and sustenance of the specified trauma pattern, with a reasonable degree of medical and scientific certainty; based on the established common knowledge and generally accepted principles of trauma patterns and their mechanisms of generation, causation, and sustenance.

The patterns of injuries generated by gunshots, firearms and ballistics weapons, and the mechanisms of generation, causation, and sustenance of these patterns of injuries are very well-established in the medical literature and are common knowledge. Based on the prevailing forensic scenario, and on the generally accepted principles and common knowledge of medicine and science, and based on the global constellation, configurations and anatomic conformations of the gunshot wounds sustained by John Alaniz, the mechanisms of generation, causation and sustenance of his fatal injuries can be determined with a reasonable degree of medical certainty.

Based on the physical characteristics and physics of ballistics, partially burnt and hot residues of the gunpowder and soot travel behind the bullet when it exits the muzzle, and due to gravitational forces and the differential densities of the bullet, soot, and residues of gunpowder in the gravitational field, the bullet can travel longest, followed by the partially burnt gunpowder residues, which travel longer than soot. Soot will travel for about 1 foot, before it is pulled down by gravitational forces, and the partially burnt gunpowder residue will travel for about 2-3 feet before it is pulled down by gravitational forces. Therefore, if the muzzle of the gun was closer to the skin by less than 1 foot, you would expect to find marginal soot deposits around the gunshot wound of entrance [close range shot]. If the muzzle of the gun was closer to the skin by less than 2-3 feet, you would expect to find powder stippling around the gunshot wound of entrance [Intermediate range shot]. If the muzzle of the gun was located greater than 2-3 feet away from the skin ad infinitum, you would expect to find only marginal abrasions around the wound without soot deposits or powder stippling [distant range shot].

If there is an eccentric accentuation of the width of the marginal abrasion, it may suggest that the muzzle of the gun was not located perpendicularly to the skin when it was fired, but rather located in the direction of the eccentric accentuation of the marginal abrasion.

The direction of travel of a bullet inside the body can be determined in the three planes of nature by the systematic dissection of the body and description of the anatomic pathway of the bullet and tissue damages and injuries, correlated with the anatomic topographic locations of the gunshot wound of entrance, gunshot wound of exit or recovery of the bullet.

The lethal capacity of a gunshot wound is primarily determined by the extent of physical anatomic damage and degree of physiological and biochemical impairment inflicted on the body by the kinetic energy the bullet transfers to the body. Bullets travel at very high velocities of up to 1200 to 1500 feet per second for bullets fired from handguns. Given the small masses of bullets, such high velocities generate extremely high levels of kinetic energy, which surpass the human body's threshold tolerance for kinetic energy.

Based on these common knowledge and generally accepted principles of medicine and science, John Alaniz's gunshot wounds documented at autopsy are summarized below:

Table One

GSW #	Location of Entrance Wound	Range of Shot	Eccentricity of Marginal Abrasion	Recovery of Bullet	Trajectory of Bullet	Immediately Fatal or Non-Fatal
1	Lateral Rostral Right Chest	Distant	Circumferential	Lower Lobe of Left Lung	BDL	Fatal
2	Lateral Anterior Proximal Right Thigh	Distant	Right Superior Eccentricity	Medial Anterior Soft Tissues of Right Thigh	BDL	Non-Fatal
3	Anterior Left Leg	Distant	Circumferential	Bullet Fell Off from Anterior Peri-Tibial Soft Tissues	BDL	Non-Fatal

Table Legend: BDL- Backward, Downward and Leftward

John Alaniz sustained a total of three gunshot wounds of his body as shown in Table One. None of the gunshot wounds of entrance exhibited any marginal soot deposit or powder stippling. This means that all the gunshot wounds sustained by John Alaniz were distant range gunshot wounds. The officer who shot John Alaniz was not located in close range or intermediate range of John Alaniz. The muzzle of the gun that fired the bullets was not located in close range or intermediate range of John Alaniz. The officer and the muzzle of the gun that fired the bullets were located greater than 2-3 feet, ad infinitum, away from John Alaniz when the gun was fired and killed John Alaniz. All the gunshot wounds of entrance described at the autopsy revealed only marginal abrasions, without soot deposits or powder stippling. John Alaniz was shot at a distance by the police officer, and the gun that fired the bullets was located at a distance from John Alaniz. John Alaniz was not within close range or intermediate range of the muzzle of the gun or of the officer when he was shot.

Out of the three gunshot wounds John Alaniz suffered, the only immediately fatal wound was the gunshot wound of his chest, designated as gunshot wound #1 in the autopsy report. The bullet that caused this wound penetrated, perforated, contused, and lacerated the pleural cavities, the right and left lungs, the mediastinum, the pericardium, the ascending aorta and the heart and caused cardiac tamponade and hemothoraces. Extensive damage and destruction of vital organs and vessels including but not limited to the lungs, the heart and the aorta could not support adequate physiological and anatomic functioning that would sustain life, and expectedly precipitated death. This was a less-survivable to non-survivable gunshot wound. This wound alone, out of the three was what killed John Alaniz. If John Alaniz was shot only twice, one in

the right thigh and one in the left leg, he would have survived. Unfortunately, only a third gunshot wound killed him.

When John Alaniz sustained gunshot wound #1 [gunshot wound of the chest], he was not facing the officer or the gun head-on or perpendicularly. He was not charging at the officer. The officer who fired the gun was located at the right side of Mr. Alaniz, slightly on the anterior right lateral side of Mr. Alaniz. This was why the gunshot wound of entrance was located in the lateral right anterior rostral chest, close to the right axilla. The bullet exhibited an acutely inclined trajectory inside the body, having traveled backward, downward and leftward from the rostral chest, across the right 3rd rib, into the upper lobe of the right lung, across the heart and into the lower lobe of the left lung where it came to settle. To sustain such an anatomic wound configuration and trajectory, John Alaniz was not standing erect on his feet facing the officer when he was shot. The level of the muzzle of the gun was higher than the level of his rostral chest. Therefore, he must have been beginning to fall to the ground or had fallen closer to the ground when he was shot and sustained gunshot wound #1.

Gunshot wound #1 was the only wound that involved critical organs of the cardiovascular system and respiratory system because the bullet perforated, contused, and lacerated the pleural cavities, the lungs, the aorta and the heart. Gunshot wound #1 was the only gunshot wound out of the three that had such severe bodily injury, which could have resulted in immediate death. Therefore, it can be reasonably concluded that if John Alaniz had not been shot in his chest, there was a reasonable medical probability that he would have survived his wounds with or without urgent and emergent medical and surgical intervention and treatment.

A bullet that perforates the chest wall and pleural cavity has a capacity to cause death without urgent and emergent medical and surgical intervention. The intra-thoracic pressure is -4 to -6 mmHg in order to maintain passive inspiratory and expiratory movements of the chest wall and diaphragm for optimal breathing. Atmospheric pressure is at 760 mmHg, so there is a differential of 764 to 766 mmHg of pressure between the atmospheric pressure and intra-thoracic pressure. When a bullet perforates the chest wall and enters the pleural cavity, it creates a one-way valve mechanism that results in the gushing of air into the pleural cavity to balance and equilibrate the intra-thoracic pressure with the atmospheric pressure. Air goes into the pleural cavity but does not exit the pleural cavity. This equilibration of pressures causes acutely and significantly raised intra-thoracic pressure, which subjects the lungs to tension. This extra-pulmonary, intra-thoracic air hypertension is termed tension pneumothorax. Tension pneumothorax prevents the lungs from expanding to inhale air, causes acute cardio-respiratory arrest, systemic and cerebral hypoxemia and hypoperfusion, which eventually results in diffuse, global, hypoxic-ischemic cerebral injury, which results in death.

In addition, a gunshot wound like gunshot wound #1 that perforates and damages the aorta and the heart causes death through the patho-physiological mechanism of global hypoxic-ischemic brain injury from traumatic hypovolemia, systemic hypotension and cerebral hypoperfusion. The human brain is a post-mitotic organ and can only survive on oxygen and glucose, which are supplied by blood that come from the heart, primarily in the internal carotid arteries and the vertebral arteries. While the brain is only about 2-3% of the body weight, it receives approximately 15% of the cardiac output at a rate of 750-900 ml/min of blood. The normal range of perfusion of the brain is about 50 to 65 ml/100 g/min [80-100 ml/100g/min for the gray matter and 20-25 ml/100g/min for the white matter, at a rate of oxygen consumption of 3.5 ml/100 g/min. The normal brain tissue partial pressure of oxygen is 35 to 40 mmHg. Brain tissue oxygen levels below 30 mmHg may cause brain tissue injury, and at 20 mmHg, the risk of

brain damage becomes exponentially elevated. The threshold for brain infarction is 10-12 ml/100g/min of blood supply with neuronal injury and death beginning in 60 to 180 seconds.

Being a post-mitotic organ, the human brain does not have any reasonable capacity to regenerate itself. This means that when the human brain suffers any type of irreversible injury, that injury is permanent and cannot be reversed or cured by the brain or by medical therapy. There are so many types of brain injuries. Hypoxic-ischemic brain injury due to hypo-perfusion or non-perfusion of the brain is only one type of brain injury. For the human brain to suffer irreversible hypoxic-ischemic brain injury, there has to be an impaired supply of oxygen and blood to the brain for a relatively long period. The established and generally accepted median or mean reference threshold time for irreversible hypoxic-ischemic brain damage to occur is 3 to 5 minutes in cumulative time.

These specified trauma-induced mechanisms of death, which were instigated by gunshot wound #1 do not result in instantaneous death. Such mechanisms of death take time to occur and eventually result in death. John Alaniz did not die instantaneously following his sustenance of trauma. He may have become immobilized and motor-non-responsive in a state of shock, but did not die instantly.

Gunshot wounds #2 and #3 were located in this right thigh and left leg, respectively. The bullets perforated only the skin and soft tissues and did not damage any vital vessel or organ. They were highly survivable injuries and did not possess any immediate lethal capacity. These wounds possessed the capacity to immediately stop, restrain or restrict his motion, mobility, and the optimal motor function and use of his right and left lower extremities.

When John Alaniz sustained gunshot wound #2 [gunshot wound of the right thigh], the officer and the gun that shot him were similarly located on the right side of Mr. Alaniz. The officer and the gun were located on the anterior right lateral side of Mr. Alaniz. John Alaniz was not facing the officer and the gun head-on or perpendicularly. Mr. Alaniz was not charging at the officer when he sustained the gunshot wound of his right thigh. The trajectory of the bullet in the right thigh was also highly inclined backward, downward and leftward. In order to exhibit such anatomic configurations and trajectory, more likely than not, Mr. Alaniz was not standing erect on his feet when he was shot by the officer. He was beginning to fall, had fallen closer to the ground or was on the ground when he was shot by the officer. In addition, the gunshot wound of entrance exhibited a right superior marginal eccentricity. The pattern of eccentricity of the marginal abrasions further confirms that the officer and the gun were standing to the right side of Mr. Alaniz, and not in his front. The superior eccentricity of the marginal abrasions also further confirm that Mr. Alaniz was not standing erect when he was shot, and was either beginning to fall to the ground, had fallen closer to the ground or was on the ground when he was shot.

Gunshot wound #3 in the left leg exhibited a very superficial trajectory and penetration of the left leg. The bullet also fell off the wound prior to the autopsy and was not recovered at autopsy. Given the limited wound characteristics of this gunshot wound, it would be unreasonable to deduce conclusions from this wound to the same extent as gunshot wounds #1 and #2. The gunshot wound of entrance exhibited a circumferential marginal abrasion. The trajectory was backward, downward and leftward. The officer and the gun that shot him were located to the right side of Mr. Alaniz when he was shot. Gunshot wound #3 did not possess any immediate lethal capacity.

2. Did John Alaniz experience conscious pain and suffering, and for how long?

It is a generally accepted principle and common knowledge in medicine and forensic pathology, that specific traumatic events generate predictable, reproducible, and specific patterns of traumas and injuries. The patterns of traumas/injuries generated by blunt force impacts, gunshots, firearms and ballistics weapons, and the mechanisms of sustenance of these patterns of traumas/injuries are very well established in the medical literature and have become common knowledge.

Patho-physiology of conscious pain and suffering

Conscious pain and suffering is initiated by widespread free nerve endings situated in the skin, soft tissues, and organs. Pain can be elicited by multiple types of stimuli classified into three broad categories: mechanical, thermal, and chemical pain stimuli. Nerve endings for pain sensations generate electrical action potentials following contact of any part of the body with an impacting surface and following all types of mechanical tissue damage caused by kinetic energy and blunt force trauma. Similarly, nerve endings for pain and heat sensations generate electrical action potentials following contact of any part of the body with flames and heat and following all types of tissue damage caused by flames and heat. The fundamental mechanism of injury sustenance for gunshots is kinetic energy transference, which causes mechanical destruction of tissues. Action potentials are the sub-cellular physiologic basis for noxious conscious sensations and originate from voltage gated sodium and potassium electrolyte membrane pumps in the cell membranes of nerve cells, fibers, and synapses.

It takes a few 10,000^{ths} of a second to generate action potentials. Action potentials are transmitted through nerve fibers to the brain. They are transmitted in peripheral nerves in the Aδ and C fibers for fast and slow pain respectively at impulse rates of 5-30 meters per second and 0.5-2 meters per second, respectively. There is therefore a double pain sensation, a fast-sharp pain, and a slow pain. The sharp pain apprises the person rapidly of imminent danger and prompts the person to react immediately and remove himself from the painful stimulus or imminent danger. The slow pain becomes greater as time passes resulting in continued intolerable pain and suffering prompting the person to continue to try to relieve the cause of the pain and flee from imminent danger.

John Alaniz was stated to be 68 inches [1.73 meters] tall in his medical records. John Alaniz felt all types of gunshot induced pain within milliseconds of contact of the bullets with his skin, and within milliseconds of direct blunt force impacts and contact of his body with any unyielding surface. One millisecond is one second divided into 1000 parts. For the slowest nervous mechanisms of pain sensation and consciousness, a man like John Alaniz felt pain within 100 milliseconds.

Nerve pathways transmitting pain, terminate in the spinal cord. Secondary pathways transmit the pain from the spinal cord to the brainstem and thalamus, especially to the reticular activating system of the brainstem. From the thalamus, tertiary pathways transmit pain to other basal ganglia, limbic cortex, and neocortex of the brain. Pain stimuli are transmitted to the reticular nuclei of the midbrain, pons, and medulla; to the tectal midbrain and the periaqueductal gray matter. These lower regions of the brain, i.e., brainstem, are vital for the appreciation of the suffering types of pain.

Animals with their brains sectioned above the midbrain, to block any impulse reaching the neocortex and cerebral hemispheres, still experience suffering from pain caused by all types of

trauma. Complete removal of the somatosensory regions of the cerebral hemispheres does not preclude an animal's ability to perceive and experience pain. Pain impulses entering the brainstem and lower centers of the human brain can cause conscious perception of pain. Pain perception is principally a function of the lower centers of the brain; however, the upper centers and cerebral hemispheres are responsible for the interpretation of the quality of pain.

Mechanical pain from tissue damage by blunt force trauma and by bullets elicit both the fast and slow pain types. Fast pain is felt within milliseconds while slow pain is felt within about one second. Following mechanical tissue damages, biochemical tissue reactants like bradykinin, serotonin, histamine, prostaglandins, leukotrienes, potassium ions, substance P, acetylcholine, acute phase reactants and proteolytic enzymes are expressed to elicit sustained secondary chemical pain in addition to the primary fast pain directly caused by mechanical tissue damages. The chemical pain elicited by these chemical reactants is a slow type of suffering pain. The intensity of pain is closely correlated with the rate of tissue damage from kinetic energy.

The brain is responsible for and sustains consciousness in human beings. The region of the brain responsible for consciousness is the brainstem. The center in the brainstem, which is responsible for consciousness, is the reticular activating system, which is deeply located in the central regions of the brainstem. As long as the reticular activating system remains anatomically and electrochemically intact, an individual like John Alaniz will remain conscious and will feel pain and experience suffering. The sensation of pain induces conscious suffering since pain is a noxious sensation, which stimulates the neocortex, limbic cortex, and forebrain to cause mental pain and suffering. All these neural processes occur in 1000^{ths} of a second [milliseconds]. The human nervous system is one of the most efficient, effective, and optimal operating systems ever known to mankind. After centuries of empirical research mankind has not been able to fully decipher and reproduce the operating systems of the human brain and nervous system.

The primary mechanisms of death for the types of gunshot wounds John Alaniz suffered, as have been described above involved tension pneumothorax and acute cardio-respiratory arrest, hypovolemia, systemic hypotension, cerebral hypoperfusion and eventual global, diffuse hypoxic-ischemic cerebral injury. The human brain is a post-mitotic organ and can only survive on oxygen and glucose, which are supplied by blood that come from the heart, primarily in the internal carotid arteries and the vertebral arteries. While the brain is only about 2-3% of the body weight, it receives approximately 15% of the cardiac output at a rate of 750-900 ml/min of blood. The normal range of perfusion of the brain is about 50 to 65 ml/100 g/min [80-100 ml/100g/min for the gray matter and 20—25 ml/100g/min for the white matter, at a rate of oxygen consumption of 3.5 ml/100 g/min. The normal brain tissue partial pressure of oxygen is 35 to 40 mmHg. Brain tissue oxygen levels below 30 mmHg may cause brain tissue injury, and at 20 mmHg, the risk of brain damage becomes exponentially elevated. The threshold for brain infarction is 10-12 ml/100g/min of blood supply with neuronal injury and death beginning in 60 to 180 seconds.

Being a post-mitotic organ, the human brain does not have any reasonable capacity to regenerate itself. This means that when the human brain suffers any type of irreversible injury, that injury is permanent and cannot be reversed or cured by the brain or by medical therapy. There are so many types of brain injuries. Hypoxic-ischemic brain injury due to hypo-perfusion or non-perfusion of the brain gunshot wounds is only one type of brain injury. For the human brain to suffer irreversible hypoxic-ischemic brain injury, there has to be an impaired supply of oxygen and blood to the brain for a relatively long period. The established and generally accepted median or mean reference threshold time for irreversible hypoxic-ischemic brain damage to occur is 3 to 5 minutes

in cumulative time. This means that irreversible brain damage can occur in less than 3 minutes or in more than 5 minutes, but with a mean or median time of close to 3 to 5 minutes.

John Alaniz's conscious pain and suffering

The terminal trauma event which resulted in the violent death of John Alaniz began moments prior to 11:32 a.m. when he was shot on May 4, 2022, when police officers arrived at the scene and accosted him. Fire Department and EMS personnel and paramedics were dispatched at approximately 11:21 a.m. and arrived at the scene at approximately 11:29 a.m. At this time John Alaniz was experiencing a psychiatric episode/ crisis and needed urgent medical attention and care. He was fully conscious and aware of his surroundings. He was not suffering from any known disease that would have precluded him from experiencing the primitive and autonomic reflexes of thirst, hunger, and pain.

Mental illness, mental retardation or dementia do not preclude patients from experiencing pain and suffering. Pain is a reflex primitive or autonomic physiological functioning of the human nervous system that does not primarily involve the higher centers of the brain including the neocortex and the subcortical ganglia and nuclei. Therefore, patients like John Alaniz who may be experiencing a psychiatric episode can still experience all forms of pain and suffering. Pain being a reflex primitive function is like hunger or thirst and is at the same level of physiological functioning as hunger or thirst. And of course, we know that psychiatric and dementia patients experience hunger and thirst, therefore they also experience pain. Their intellectual or cognitive interpretation or assessment of the pain may be impaired but is not required to experience pain and suffering.

Mr. Alaniz's reticular activating system was completely intact and functional. As a 34-year-old adult male he had the mental capacity to identify and perceive the approaching officers and guns, the noises and lights of the police vehicles, and the orders. At this moment, the brainstem nuclei, the frontal cortex, pre-frontal cortex, basal forebrain, and limbic cortex of John Alaniz's brain initiated, within 10,000th of a second, action potentials, which initiated within milliseconds, the primitive human reflexes of fleeing from perceived threat or danger. The videos show a man exhibiting this primitive reflex of fleeing from perceived threat when he was shot.

This mental awareness of imminent or perceived danger initiated the nor-adrenergic and adrenergic biochemical neural responses of fright, flight, and fight, when the locus ceruleus of the brainstem released large amounts of nor-adrenalin to the cerebral hemispheres. This fright, flight and fight adrenergic response caused high levels of mental pain and suffering. His heart started pumping faster [chronotropic effect] and stronger [ionotropic effect] due to the nor-adrenergic/adrenergic response. His respiratory rate and general muscle tonicity increased as well due to the nor-adrenergic/adrenergic response.

All these patho-physiologic processes culminated in high levels of conscious mental pain and suffering. The high levels of mental pain and suffering resulted in attendant somatic and chemical pain and suffering as a result of the body's pathophysiological and biochemical responses to mental pain and suffering. The various domains of his brain and cerebral functioning were intact and identified the imminent danger within 1000^{ths} of a second. His limbic system instigated high levels of primitive adrenergic fright-flight-fight response, which caused high levels of mental, somatic and chemical pain and suffering.

The fright, flight and fight autonomic response prompted John Alaniz to attempt to flee from the officers and run away. At this time, all the mental, somatic, and chemical pain John Alaniz was

suffering continued and progressed in intensity. Firing the gun generated loud blast noises in close range which instigated mechanical ossicular noxious stimuli and pain from transmission of such loud noises.

As the autopsies have documented, John Alaniz sustained multiple blunt force impacts and blunt force trauma during his lethal event. Each impact initiated multimodal transfer of kinetic energy from the ground. At this time, John Alaniz experienced physical and mechanical somatic pain caused by every blunt force impact his body sustained. Each blunt force impact of his body activated hundreds to thousands of nerve endings in his tissues and organs and elicited millions of pain action potentials, which were transmitted to the spinal cord and brain to cause high levels of conscious somatic pain, which caused high levels of conscious somatic suffering, which in turn elicited high levels of novel mental pain and suffering, which synergized with the previously existing mental and somatic pain and suffering. Within milliseconds to seconds of his trauma, the biochemical cycles and systems in his body began to express acute reactant proteins and peptides in response, which elicited more chemical pain and suffering, and further accentuated his global conscious mental, somatic and chemical pain, and suffering.

Following the gunshots, the bullets traveled through air, hit, and perforated John Alaniz's trunk and extremities. When the bullets perforated John Alaniz's skin, soft tissues, organs, and skeleton they transferred high levels of kinetic energy⁶ and thermal energy to the tissues causing mechanical tissue damages and destruction, which activated thousands to millions of nerve endings and action potentials. He experienced more somatic pain and suffering with the attendant and accompanying mental and chemical pain and suffering within 100 milliseconds of sustenance of his gunshot wounds.

The bullets perforated and damaged the skin, soft tissues, skeleton and viscerae of the trunk and extremities, chest walls, pleural and pericardial cavities and mediastinum. Perforation of the chest wall and pleural cavity caused acute and marked elevation of the intra-thoracic pressure in equilibrium with the atmospheric pressure, which caused pulmonary atelectasis and acute cardio-respiratory failure. Perforations, contusions and lacerations of soft tissues, heart, blood vessels and visceral parenchyma precipitated hemorrhages and traumatic cardiac arrest which resulted in acute decompensation of the vascular pressure and cerebral perfusion pressure. The constellation of these injuries resulted in acute traumatic shock, which in turn activated millions of nerve endings and action potentials, generated more high levels of somatic and chemical pain and suffering combined with the attendant mental pain and suffering in response.

The multimodal transfer of kinetic energy, including the gunshot wounds and the multifocal blunt force impacts of different regions of his body induced physical and mechanical somatic pain and suffering, accompanied by attendant mental and chemical pain and suffering. Action potentials were transmitted to the spinal cord and brain to cause high levels of composite conscious pain and suffering. Given the large amounts of kinetic energy a bullet generates, and the matching degree of tissue damage and destruction, the levels of pain and suffering were expectedly high-scale. At this time, the novel mental, somatic, and chemical pain and suffering synergized with the pre-existing and continuing mental, somatic, and chemical pain and suffering. This synergism caused increasingly higher levels of pain and suffering.

⁶ A bullet traveling at a linear velocity of over 1200 feet per second possesses large amounts of kinetic energy.

Fire Department personnel and paramedics arrived at the patient side at approximately 11:33 to 11:35 a.m. CPR was in progress and the GCS was 3/15. John Alaniz was pronounced dead at 12:08 p.m.

He continued to experience mental, somatic, and chemical pain, and suffering, as the cascades of chemical pain and suffering were intensifying his conscious pain and suffering. Within seconds of his trauma, the biochemical cycles and systems in his body began to express acute reactant proteins and peptides in response to the high levels of traumatic stress, which elicited novel chemical pain and suffering, and further accentuated his global conscious pain and suffering.

During this time, his traumatic and hypovolemic shock progressed and began to cause hypoxic-ischemic brain injury. The attendant pathophysiological and biochemical responses of the body including but not limited to systemic inflammatory response, enzymatic, proteomic, and biochemical cyclic responses and expression in addition generated more and novel chemical pain, which added to and accentuated the global conscious mental, somatic and chemical pain John Alaniz was experiencing.

As he continued to suffer the sequelae of his trauma on the ground, traumatic shock progressed, and he began to pass through the levels and spectrum of consciousness with diminishing sensorium. He began to pass from full alertness to lethargy or somnolence, to obtundation, to stupor or semi-coma, and eventually to superficial or light coma to deep coma, loss of consciousness and eventually death, as he progressively suffered the sequelae of his trauma and a post-traumatic shock state. At this time, he remained in a state of progressive hypovolemic and traumatic shock.

In spite of his injuries, his brain and neural axis remained functionally intact. His subcortical ganglia and brainstem nuclei of the cranial nerves remained intact. His reticular activating system remained electrochemically intact. The distinctive anatomy of his injuries enabled him to continue to experience increasingly higher levels of somatic pain and suffering, mental pain and suffering, chemical pain, and suffering. The vertebral trauma and para-spinal trauma he suffered may have placed him in a state of spinal shock which could have made him flaccid and unresponsive but conscious.

The secondary traumatic sequences of his injuries progressed, including traumatic shock, hemorrhagic shock, acute cardio-respiratory arrest, and hypoxic-ischemic cerebral injury. He progressed into deeper levels of traumatic and hypovolemic shock, as he developed more severe and advanced stages of cerebral hypoperfusion and cerebral hypoxic-ischemic injury. Traumatic shock and composite biochemical acute responses to injury progressed to multi-organ-system failure, coma, and death.

Full alertness and consciousness is a GCS of 15/15, and loss of consciousness may be a GCS of 7-8/15 or less. A drop of GCS from 15/15/ to 7-8/15 does not happen at an instant following all forms of non-catastrophic injuries. Pathophysiological processes are involved, and these processes take time to occur. Catastrophic injuries may be involved in the instance of a high-scale explosion like a bomb that splinters the body into pieces at an instant or a nuclear bomb and annihilation. John Alaniz suffered serious and fatal injuries, but he did not suffer catastrophic injuries like injuries from a massive bomb.

According to medical definitions and criteria, John Alaniz's body continued to experience debilitating pain and suffering although he was in a state of coma. The human body continues to

experience debilitating trauma-induced and physiologic chemical pain and suffering until there is a complete cessation of all bodily functions and death. Human beings who are in coma do experience chemical bodily pain and suffering as long as the central nervous system is intact. The unconscious patient remains in a state of high human suffering especially due to chemical pain and suffering because of the ongoing biochemical and molecular responses and systems in his body, especially in response to traumatic shock. In fact, one of the clinical tests for the evaluation of the depth or severity of unconsciousness is to intentionally inflict somatic pain to an extremity of the unconscious patient and observe the patient to see if he withdraws his extremity from the source of pain, moans, or grimaces. Again, this is one of the medical reasons why the majority of unconscious patients in the intensive care unit of hospitals are on strong pain medications and narcotic analgesics like Morphine and Fentanyl although they are in a coma. This is also why the lowest score for the Glasgow Coma Scale is 3/15 and not 0/15, and in part why analgesics and narcotic analgesics are given to patients who are under anesthesia, and are components of drug panels used for anesthesia.

Although loss of consciousness and death are frequently immediate, they are rarely instantaneous since loss of consciousness and death are processes that involve cascades of patho-physiologic events. The adjective "immediate," within a forensic context, and within the prevailing forensic scenario in this case should be interpreted as death occurring as a result of gunshot wounds without the intervention of another novel or independent object, cause, or factor. It should not be forensically construed as instantaneous.

Based on the global prevailing forensic scenarios in this case and based on the generally accepted principles and common knowledge of medicine and science, including the central limit theorem, John Alaniz experienced high levels of conscious somatic, mental, and chemical pain and suffering for less than 3 to 5 minutes beginning from the time he was accosted by the police officers to the time he was shot, fell to the ground and began suffering the sequelae of his gunshot wounds ^{7,8}. He experienced pre-death pain and suffering for less than 30-40 minutes [from the time he was accosted by the police to the time he was pronounced dead at about 12:08 p.m.]^{9,10}.

I have provided all my opinions and conclusions with a reasonable degree of medical certainty.

⁷ Medicine is not an absolute science, and these estimated ranges should not be interpreted as absolute quantitative estimations of time. Quantitative ranges of any measurable index are common practice and are the standard of practice in pathology and medicine in part based on the principles of the central limit theorem.

⁸ Human events like loss of consciousness and death involve a continuum of pathophysiological events on the cellular and gross functional levels without any identifiable rigid transitions or demarcations. Therefore, the determination of the time of occurrence of these events are guided by the time the events have been reproducibly and quantifiably confirmed. For example, the time of death of any individual is determined by the time the individual was pronounced dead by a designated medical professional who has clinically assessed the patient and confirmed the patient to be dead based on prevailing, reproducible and quantifiable clinical evidence that the patient was dead.

⁹ Medicine is not an absolute science, and these estimated ranges should not be interpreted as absolute quantitative estimations of time. Quantitative ranges of any measurable index are common practice and are the standard of practice in pathology and medicine, in part based on the principles of the central limit theorem.

Therefore, the determination of the time of occurrence of these events are guided by the time the events have been reproducibly and quantifiably confirmed. For example, the time of death of any individual is determined by the time the individual was pronounced dead by a designated medical professional who has clinically assessed the patient and confirmed the patient to be dead based on prevailing, reproducible and quantifiable clinical evidence that the patient was dead.

John Joseph Alaniz, Deceased
Medico-Legal Report

Honorary Doctorate Degrees:

1. Doctor of Science
Westminster College
Fulton, Missouri, September 15, 2016
2. Doctor of Science
Xavier University of Louisiana
New Orleans, Louisiana, May 7, 2016
3. Doctor of Science
Royal College of Surgeons in Ireland
Dublin, Ireland, June 7, 2017

Degrees and Certifications:

1. Board Certification in Anatomic Pathology (AP)
Diplomate, American Board of Pathology
American Board of Pathology, July 2002.
2. Board Certification in Clinical Pathology (CP)
Diplomate, American Board of Pathology
American Board of Pathology, July 2003.
3. Board Certification in Forensic Pathology (FP)
Diplomate, American Board of Pathology
American Board of Pathology, November 2004.
4. Board Certification in Neuropathology (NP)
Diplomate, American Board of Pathology
American Board of Pathology, September 2005.
5. Board Certification in Medical Management
Certified Physician Executive [CPE]
Certifying Commission in Medical Management
American College of Physician Executives, February 2011
6. Masters in Public Health (MPH), Epidemiology
University of Pittsburgh, Graduate School of Public Health
Pittsburgh, Pennsylvania, April 2004.
7. Masters in Business Administration [MBA]
Tepper School of Business, Carnegie-Mellon University
Pittsburgh, Pennsylvania, May 2008.
8. One year clinical Internship Certificate, general/ family practice
University of Nigeria Teaching Hospital, Enugu, Nigeria, January 1992.

9. Bachelor of Medicine and Bachelor of Surgery (M. B., B. S.)
University of Nigeria, Enugu, Nigeria, June 1990.
10. United States Medical Licensing Examinations (Steps I and II), September 1993.
11. United States Medical Licensing Examination Step III, May 1998.
12. Grade 1 certificate in the Theory of Music, The Royal Schools of Music, London, England, 1981.

Professional and Post-Graduate Education and Training

1. College of Medicine,
University of Nigeria, Enugu, Nigeria. July 1984 - July 1990
2. House Physician,
Department of Pediatrics,
Enugu General Hospital, Enugu, Nigeria. August 1990 - Dec. 1990
3. Internship in General/ Family Practice,
University of Nigeria, Hospital, Enugu, Nigeria. January 1991 - January 1992
4. Emergency Room Physician,
Jos University Hospital, Jos, Nigeria. March 1992 - October 1994
5. Visiting/ Research Scholar,
Cancer Epidemiology, Dept. of Epidemiology,
School of Public Health, University of Washington, Seattle. October 1994 - June 1995
6. Pathology Residency, Anatomic/ Clinical
College of Physicians and Surgeons of Columbia University,
Harlem Hospital Center, New York City. July 1995 - June 1999
7. Fellowship training in Forensic Pathology,
Allegheny County Coroner's Office
University of Pittsburgh, Pittsburgh, Pennsylvania. July 1999 - June 2000
8. Fellowship training in Neuropathology,
University of Pittsburgh Medical Center
University of Pittsburgh, Pittsburgh, Pennsylvania. July 2000 - June 2002
9. Masters in Public Health: Epidemiology
Graduate School of Public Health
University of Pittsburgh, Pittsburgh, Pennsylvania June 2002 – April 2004

10. Masters in Business Administration
Tepper School of Business
Carnegie Mellon University, Pittsburgh, Pennsylvania August 2005 – May 2008

Medical Licensure

1. License of practice as a physician, unrestricted, State of Indiana 1998 - 2023
2. License of practice as a physician, unrestricted, State of Pennsylvania 1998 - 2023
3. License of practice as a physician, unrestricted, State of Hawaii 2003 - 2023
4. License of practice as a physician, unrestricted, State of California 2007 – Present

Professional Medical Affiliations and Memberships

1. Member, American Association of Physician Leadership, 2006 – present
2. Member, American Association for the Advancement of Science [AAAS], 2005 – present
3. Fellow, College of American Pathologists (CAP), 1995 – present
4. Fellow, American Society of Clinical Pathologists (ASCP), 1995 – present
5. Member, American Association of Neuropathologists (AANP), 2002 – present
6. Member, National Association of Medical Examiners (NAME), 1999 – present
7. Member, American Academy of Forensic Sciences, 2004 – present
8. Member, United States and Canadian Academy of Pathology, 2003 – present
9. Member, International Academy of Pathology, 2003 – present
10. Fellow, American College of Epidemiology, 2004 – present
11. Member, American Association of Public Health Physicians, 2004 – present
12. Member, American Public Health Association, 2004 - present
13. Member, American Society for Investigative Pathology, 2004 - present
14. Member, American Medical Association (AMA), 2002 - present
15. Member, San Joaquin Medical Society, 2009 – present
16. Member, California Medical Society, 2009 – present
17. Member, California Society of Pathologists, 2015 - present
18. Member, Union of American Physicians and Dentists, 2007 - present
19. Member, Pennsylvania Medical Society, 2003 - 2007

20. Member, Allegheny County Medical Society, 2003 – 2007
21. Member, New York County Medical Society, 1997 - 1999
22. Member, Nigerian Medical and Dental Council, 1990
23. Member, Association of Nigerian Physicians in the Americas, 2017 - present

Appointments

1. Consulting Forensic Pathologist-Neuropathologist, Kaiser Permanente Hospitals, Central California, February 2018 – Present.
2. Physician Associate and Professor, Department of Medical Pathology and Laboratory Medicine, University of California, Davis, February 2018 – Present.
3. Consulting Forensic Pathologist-Neuropathologist, Yosemite Pathology Medical Group, January 2018 – Present.
4. Consulting Forensic Pathologist-Neuropathologist, Lake County, California, February 2018 - Present.
5. Visiting Professor, Emory University, Department of Pathology and Laboratory Medicine, March 2017.
6. Clinical Professor, Department of Medical Pathology and Laboratory Medicine, University of California, Davis, January 2017 – Present.
7. Co-Director/Co-Founder, Taumark, Inc, Better Brain Diagnostics, May 2013 – present.
8. Chief Medical Examiner, Washington, D.C. Appointed on October 11, 2013. Declined Offer.
9. Co-Director, Brain Injury Research Institute, West Virginia University/NorthShore University Health System, November 2009 – present.
10. Visiting Professor, Department of Neurosurgery, West Virginia University, Dec. 2009 – Dec. 2011
11. Member, NFL Players Association Concussion and Traumatic Brain Injury Committee, December 2009 – 2012.
12. Visiting Professor, Rockefeller Institute of Neuroscience, Morgantown, Virginia, August 2009 – April 2010.
13. Chief Medical Examiner, San Joaquin County, California, September 2007 – March 2018.
14. Associate Clinical Professor, Department of Medical Pathology and Laboratory Medicine, University of California, Davis, September 2013 – January 2017.

15. Clinical Professor of Pathology, Department of Pathology, University of California, Davis, March 2012 – July 2013.
16. Associate Physician Diplomate, Medical Pathology and Laboratory Medicine, University of California-Davis Medical Center, March 2012 – July 2013.
17. Associate Clinical Professor of Pathology, Department of Pathology, University of California, Davis, May 2008 – January 2012.
18. Adjunct Assistant Professor of Pathology, University of Pittsburgh, Pittsburgh, Pennsylvania, June 2010 – 2012.
19. Assistant Clinical Professor of Epidemiology, Department of Epidemiology, Graduate School of Public Health, University of Pittsburgh, March 2004 – 2008
20. Clinical Associate Professor of Pathology and Clinical Instructor, Department of Pathology, University of Pittsburgh, Pittsburgh, Pennsylvania, May 2003 – 2009
21. Attending Forensic Pathologist, Allegheny County Coroner’s Office, July 2002 – March 2007
22. Attending Forensic Neuropathologist, Allegheny County Coroner’s Office, July 2002 – March 2007
23. Associate Forensic Pathologist, Allegheny County Coroner’s Office, July 2000 – June 2002

15. "Don't Break the Rules, Change the Game: How Bennet Omalu Single-Handedly Changed American Football, Professional Sports, and How the World Perceives Traumatic Brain Injuries". American Academy of Neurology Annual Meeting, Los Angeles, California, April 25, 2018.
16. Keynote Speech: Conformational Intelligence and Innovation, 2018 MedHealth Summit, Michigan, United States, and Ontario, Canada. Detroit, Michigan, April 19, 2018.
17. "An Afternoon with Dr. Bennet Omalu". Florida Justice Association, World Center Marriot Hotel, Annual Meeting, Orlando, Florida, March 23, 2018.
18. "An Evening with Dr. Bennet Omalu". The Hinman Dental Society, Georgia World Congress Center, Atlanta, Georgia, March 22, 2018.
19. "NFLPA Denver Chapter Movie Night, "Concussion". Sports Legend Assistance Fund in affiliation with NFLPA Denver Chapter, Landmark Theater, Greenwood Village, Colorado, November 9, 2017.
20. "Don't Break the Rules; Change the Game". Tulsa Town Hall, Tulsa Performing Arts Center, Tulsa, Oklahoma, October 27, 2017.
21. "An Evening with Dr. Bennet Omalu". Baraboo Growth, LLC, Milwaukee Club, Milwaukee, Wisconsin, October 24, 2017.
22. "American Football, Player Safety and Health, and Future of Contact Sports". Chicago Ideas, Morningstar, Chicago, Illinois, October 21, 2017.
23. "An Evening with Dr. Bennet Omalu". Commonwealth Club Present Dr. Bennet Omalu, The Commonwealth Club, San Francisco, California, August 23, 2017.
24. "Don't Break the rules, Change the Game: How Bennet Omalu single-handedly changed American football, professional sports, and how the world perceives traumatic brain injuries". Keynote Address, Life Chiropractic College West, Wave 2017 Conference, San Francisco, California, August 5, 2017.
25. Keynote/Commencement Speaker, Conferring Ceremony, School of Medicine, Royal College of Surgeons in Ireland, Dublin, Ireland, June 7, 2017.

26. "An Evening with Bennet Omalu". North Shore University Hospital Medical Staff Society, 2017 Dinner and Awards Ceremony. Garden City, New York, May 4, 2017.
27. "An Evening with Bennet Omalu". University of North Carolina- Wilmington, Leadership Lecture, Wilmington, North Carolina, March 29, 2017.
28. "Don't Break the Rules, Change the Game: How Bennet Omalu single-handedly changed American Football, Professional Sports, and how the world perceives traumatic brain injuries." Frederick Speaker Series, Weinberg Center for the Arts, Inc. Frederick, Maryland, March 23, 2017.
29. "The Science and Humanity of Chronic Traumatic Encephalopathy". Professional Development Working Group Seminar, Department of Defense, Congressionally Directed Medical Research Programs, Ft. Detrick, Maryland, March 22, 2017.
30. "Conformational Intelligence and the Humanity of Science", Dept of Pathology and Laboratory Medicine Grand Rounds, Emory University, School of Medicine, Department of Pathology and Laboratory Medicine, Atlanta, Georgia, March 13, 2017.
31. "A Morning with Dr. Bennet Omalu", CTE, FTD: Connecting the Dots- Focus on Tau, Frontotemporal Labor Degeneration Association, The University of Texas Health Science Center, San Antonio, Texas, March 11, 2017.
32. "A Morning with Dr. Bennet Omalu", Key Note Speaker, 2017 Breakfast with Friends, Catholic Charities Community Service, Rochester, New York, March 3, 2017.
33. "An Evening with Dr. Bennet Omalu". 2017 Sanderson Lecture, Thomas J. Long School of Pharmacy and Health Sciences, University of the Pacific, Stockton, California, March 1, 2017.
34. "Concussion + The Mustard Seed Effect- How Small Steps Can Spark Big Change". Chambers Lecture Series, Boston College, Chestnut Hill, Massachusetts, February 23, 2017.
35. "The Science and Consequences of Concussions: Shedding Light on CTE Disease", UC Davis, Capitol Speaker Series, UC Center Sacramento, 1130 K Street, LL22, Sacramento, CA 95814, February 22, 2017.
36. "A Morning with Dr. Bennet Omalu, Unlocking Your Full Potential: how to have a positive impact on communities, families and the world while navigating the complexities of wealth." The Threshold Group, Sausalito, California, February 22, 2017.
37. "Chronic Traumatic Encephalopathy, My Life and My Work". Court of Appeal, 3rd Appellate District, 914 Capitol Mall, Sacramento, CA 95814, January 5, 2017.
38. "An Evening with Dr. Bennet Omalu". Banner Bon Sante Ball, Banner Health Foundation, Scottsdale, Arizona, December 10, 2016.

39. "An Evening with Bennet Omalu". Pacific Northwest Chapter, World President's Organization and Young President's Organization. Concussions in Sports meeting, Swedish Neuroscience Institute, Seattle Washington, November 9, 2016.
40. "Don't Break the Rules, Change the Game", Missouri Hospital Association, 94th Annual Convention and Tradeshow, Osage Beach, Missouri, November 3, 2016.
41. "An Afternoon with Bennet Omalu". Better Business Bureau, Inc. Annual Integrity Awards Luncheon, La Vista, Nebraska, November 2, 2016.
42. "The Science and Humanity of Chronic Traumatic Encephalopathy". Navy SEAL Foundation, Inc. Navy SEAL Foundation Mental Health and Veteran Care Convening, San Diego, California, November 1, 2016.
43. "An Afternoon with Bennet Omalu". California Primary Care Association, 2016 Annual Conference, Long Beach, California, October 27, 2016.
44. "An Evening with Bennet Omalu". University Distinguished Speaker Event, Healthy Nevada Speaker Series, University of Nevada, Reno, Nevada, October 25, 2016.
45. "A Morning with Bennet Omalu". American Academy of Physical Medicine and Rehabilitation, 2016 Annual Assembly, New Orleans, Louisiana, October 21, 2016.
46. "An Afternoon with Bennet Omalu". American Health Information Management. 2016 AHIMA Annual Convention, Baltimore, Maryland, October 19, 2016.
47. "An Evening with Dr. Bennet Omalu". Key Note Speaker, El Paso Hispanic Chamber of Commerce, Dreams and Visions to Reality Equal, Annual Fiesta Celebration, El Paso, Texas, October 15, 2016.
48. "An Evening with Bennet Omalu", Patricia H. Snyder Concert and Lecture Series, University of Evansville, Evansville, Indiana, Annual Endowed Lecture and Concert Series on Innovation, research, and healthcare, October 13, 2016.
49. "A morning with Bennet Omalu". Annual Meeting, Indiana Hospital Association, Indianapolis, Indiana, October, 6, 2016.
50. "An Evening with Bennet Omalu". University Lecture Series, Miami University of Ohio, Oxford, Ohio, October 3, 2016.
51. "An Evening with Bennet Omalu". College Endowed Lecture Series, the Anna B. Mow Symposium on Comparative Religious Ethics, Bridgewater College, Bridgewater, Virginia, September 28, 2016.

52. "Don't break the rules, change the game: How Bennet Omalu single-handedly changed American Football, Professional sports, and how the world perceives traumatic brain injuries." Spotlight Program Board's Distinguished Speaker Series, Georgia State University, Atlanta, Georgia, September 27, 2016.
53. "Don't Break the Rules, Change the Game". Key note speaker, The Brain Injury Association of Michigan, 36th Annual Fall Conference, Lansing, Michigan, September 22, 2016.
54. "An Evening with Bennet Omalu", "Lost and Found" – Thrival Innovation Day 1, Thrival Festival, Thrill Mill, Inc, Pittsburgh, Pennsylvania, September 20, 2016.
55. "The Humanity of Science and Conformational Intelligence: The Bennet Omalu Story", Westminster College Hancock Symposium, The Green Lecture, Westminster College, Fulton, Missouri, September 15, 2016.
56. "An Evening with Bennet Omalu". University of Missouri, Columbia, Annual Delta Gamma Lecture Series on Values & Ethics, Jesse Auditorium, September 14, 2016.
57. "An Afternoon with Bennet Omalu". KPMG's International Partners Meeting, Prague, Czech Republic, September 12, 2016.
58. "An Evening with Bennet Omalu: Don't Break the Rules, Change the Game: How Bennet Omalu single-handedly changed American football, Professional sports, and how the world perceives traumatic brain injuries. University of Tennessee, Alumni Memorial Building, Cox Auditorium, Knoxville, Tennessee, August 31, 2016.
59. "An Afternoon with Bennet Omalu" Leadership Tyler. Leadership Live 2016, Tyler, Texas. August 30, 2016.
60. "A Forensic Pathologist, Chronic Traumatic Encephalopathy [CTE] and Conformational Intelligence [CI]". Keynote Speaker, American College of Legal Medicine, 22nd Annual World Congress of Medical Law, Los Angeles, California, August 10, 2016.
61. "Chronic Traumatic Encephalopathy: A Journey from Pathology Discovery to Advocacy and Beyond." Association of Pathology Chairs, 2016 Annual Meeting, San Diego, California, July 15, 2016.
62. "Don't Break the Rules, Change the Game". Keynote Address, Society of Corporate Secretaries and Governance Professionals, Annual National Conference, Colorado Springs, Colorado, June 25, 2016.
63. "Working as a Team to Seek the Truth: Bennet Omalu's Journey on Discovering CTE and Making the Movie Concussion". Key note speaker, Association of Nigerian Physicians in the Americas [ANPA], 2016 Convention and Scientific Assembly, Las Vegas, Nevada, June 23, 2016.

64. "Interview with Dr. Omalu, moderated by Buzz Bissinger". Aspen Ideas Festival Spotlight Health, The Aspen Institute, Aspen, Colorado, June 24, 2016.
65. "Don't Break the Rules, Change the Game: How Bennet Omalu single-handedly changed American football, Professional sports, and how the world perceives traumatic brain injuries." Vizient New England CEO Executive Board Meeting, York, Maine. June 22, 2016.
66. "Don't Break the Rules, Change the Game: How Bennet Omalu single-handedly changed American football, Professional sports, and how the world perceives traumatic brain injuries" Vizient Upper Midwest Executive Board Meeting, Chicago, Illinois, June 14, 2015.
67. "Interview with Will Smith and Bennet Omalu, moderated by Jim Greenwood, CEO, BIO [Biotechnology Innovation Organization]", 2015 BIO International Convention, San Francisco, California, June 7, 2015.
68. "Don't Break the Rules, Change the Game: How Bennet Omalu single-handedly changed American football, Professional Sports, and how the world perceives traumatic brain injuries". Vizient New England CEO Executive Board Meeting, Williamsburgh, Virginia, June 2, 2016.
69. 2016 Project Play Summit, The Aspen Institute, Newseum, Washington, DC, May 17, 2016.
70. A Morning with Dr. Bennet Omalu. Western Health Care Leadership Academy, California Medical Association, San Francisco, California, May 15, 2016.
71. An Evening with Dr. Bennet Omalu. Drexel Neurosciences Institute Inaugural Neurosciences Conference. Drexel Neuroscience Institute, Drexel University College of Medicine, Atlantic City, New Jersey, May 11, 2016.
72. A Morning with Bennet Omalu. US Trust President's Award Program, Bank of America/ U.S. Trust, Colorado Springs, Colorado, May 10, 2016.
73. An Afternoon with Bennet Omalu. Annual SAS Health Care and Life Sciences Executive Conference, SAS Institute, Inc., Cary, North Carolina, May 4, 2016.
74. An Afternoon with Bennet Omalu. 2016 Diversity & Inclusion Symposium, Carolinas Healthcare System, Charlotte, North Carolina, April 28, 2016.
75. An Evening with Bennet Omalu. Healthcare Business Summit, MedAssets, Las Vegas, Nevada, April 26, 2016.
76. An Evening with Bennet Omalu. The Institute For Rehabilitation and Research [TIRR], Houston, Texas, April 21, 2016.
77. The 2016 Significant Speaker Event, Gallogly Events Center, University of Colorado, Colorado Springs. An Evening with Dr. Bennet Omalu: Don't Break the Rules, Change the Game: How Bennet Omalu single-handedly changed American football, professional sports,

how the world perceived traumatic brain injuries, and making small steps to spark a major change. April 19, 2016.

78. Speaker, W.L. Mellon Series, Tepper School of Business, Carnegie Mellon University, April 14, 2016. The W.L. Mellon Speaker Series enables students to interact with global leaders, CEOs and management experts in student forums that encourage insightful and lively dialogue.

81. "Concussion: The Story Behind the Movie". 68th Annual Meeting, San Francisco Neurological Society, Sonoma, California, March 12, 2016.
82. "Don't Break the Rules, Change the Game". 11th Annual Brain Injury and Rehabilitation Conference, Liberty Station Conference Center, The Rehabilitation Center at Scripps Memorial Hospital Encinitas, San Diego, California. March 11, 2016.
83. "An Evening with Bennet Omalu". Oklahoma State University, Speakers' Board, Wes Watkins Center, Stillwater, Oklahoma, March 9, 2016.
84. "An Afternoon with Bennet Omalu". Vivo Capital Annual Limited Partner Meeting. Palo Alto, California, March 2, 2016.
85. "An Afternoon with Bennet Omalu- Discussing the Discovery of CTE". Wounded Warrior Battalion (West), Camp Pendleton, California, March 1, 2016.
86. "An Afternoon with Bennet Omalu". California Schools Employee Association and California Schools VEBA- Benefit University. Anaheim, California, February 29, 2016.
87. "An Evening with Bennet Omalu". Inspiring Minds Speaker Series, Beth El Synagogue, St. Louis Park, Minnesota, February 25, 2016.
88. "An Afternoon with Bennet Omalu". California Schools VEBA/ United HealthCare, Sacramento, California, February 23, 2016.
89. "Concussion: An Evening with Bennet Omalu". Ohio State University, Columbus, Ohio, February 18, 2016.
90. "An Evening with Bennet Omalu". Lifelong Learning Society, Florida Atlantic University, Jupiter, Florida, February 16, 2016.
91. "A Morning with Bennet Omalu". 2016 MedAssets Healthcare Executive Forum. The Westin Kierland Resort & Spa, Scottsdale, Arizona, February 6, 2016.

92. "50 Minute Interview with Stone Phillips". City Arts & Lectures, Nourse Theatre, San Francisco, California, February 4, 2016.
93. "An Evening with Bennet Omalu". Frontier Forum Lecture Series, Straz Center for the Performing Arts, University of South Florida, Tampa, Florida, December 3, 2015.
94. Keynote speaker: "Courageous Truth-Seeker: One Pathologist's Quest for a Diagnostic Breakthrough". The College of American Pathologists Annual Conference [CAP] 2015, Nashville, Tennessee, October 4, 2015.
95. Panelist, Concussion Litigation: Past, Present and Future. California Judges Association, 2015 Mid-Year Conference. May 1-3, 2015, Indian Wells, California.
96. Keynote speaker, Law Day Luncheon 2015. The San Joaquin County Bar Association and Foundation. Thursday April 30, 2015.
97. Chronic Traumatic Encephalopathy [CTE] and Emerging In-Vivo Diagnosis. Santa Clara Valley Brain Injury Conference. Conversations on Coma to Community. February 5-7, 2015, Santa Clara Marriott, Santa Clara, California.
98. The Historical Foundation of Chronic Traumatic Encephalopathy [CTE]: The Role of the Medical Examiner. West Coast Training Conference "Games People Play". Wednesday, April 23, 2014. County of Los Angeles Department of Medical Examiner-Coroner. Beverly Garland, North Hollywood, Los Angeles, California.
99. Emerging In-Vivo Diagnosis of Chronic Traumatic Encephalopathy. Grand Rounds Lecture, Monday, December 2, 2013. Department of Medical Pathology and Laboratory Medicine, University of California, Davis.
100. Chronic Traumatic Encephalopathy: Current Understanding of Clinicopathologic Features; A Forensic Perspective. American Academy of Neurology, 65th Annual Meeting. San Diego, March 16-23, 2013. San Diego Convention Center. March 21, 2013: Cumulative Sports Concussion and Risk of Dementia Course.
101. CTE: A Historical Perspective- Pathological Overview and Taupathy. Mild Head Injury, Concussion, and Return to Activities: Update 2013. Symposium, Friday, January 25, 2013. The University of Chicago, Section of Neurosurgery, Department of Surgery. The University of Chicago Gleacher Center, 450 North Cityfront Plaza Drive. Chicago, Illinois.
102. History, Definition and Clinicopathologic Features of Chronic Traumatic Encephalopathy [CTE]. Sports Concussion Institute, The National Summit On Sports Concussion And Other Athletic Injuries. June 22, 2012. Los Angeles, California.
103. "Pathophysiology of Traumatic Brain Injury". Manteca Unified School District, School Nurses. Manteca, California. March 19, 2012.

104. "Sociology of Health & Illness". Department of Sociology, University of Pacific, Stockton Campus, Stockton, California. March 15, 2012.
105. "Chronic Traumatic Encephalopathy and PTSD". Grand Rounds, Department of Neurosurgery, University of California, Davis, Sacramento, California, March 13, 2012.
106. "Motivational Lecture and Forensics: Becoming What You Want to Become" San Joaquin County Youth Leadership Academy, District Attorney's Office, June 27, 2012.
107. "Youth Leadership for Change", 2012 Law Day Educational Program, San Joaquin County Bar Association. April 26, 2012.
108. "Chronic Traumatic Encephalopathy and PTSD" Full-Day Dementia Program, San Francisco Neurological Society. Sir Francis Drake Hotel, San Francisco, California, Friday, October 14, 2011.
109. "Taupathy and Chronic Traumatic Encephalopathy" Grand Rounds, Department of Pathology, University of California-Davis, Sacramento, California. April 18, 2011.
110. "Long Term Effects of Repeated Impacts to the Head in American Athletes". Brain Rehabilitation and Injury Network. Thinktank 2011, Long Beach, California. March 27, 2011.
111. "Chronic Traumatic Encephalopathy in American Athletes". Visiting Professor, Grand Rounds, University of California, San Francisco, Department of Neurology, Memory and Aging Center, March 11, 2011.
112. Motivational Lecture to One Hope School, County Operated Schools and Programs, San Joaquin County Office of Education. October 24 and 25, 2011
113. "Motivational Lecture and Forensics: the value and importance of education" San Joaquin County Youth Leadership Academy, District Attorney's Office, June 29, 2011.
114. Employee Personal Motivation Lecture. Employee Mentoring Program, Equal Employment Opportunity Office, San Joaquin County, Administration Building, 44 North San Joaquin Street, June 16, 2011.
115. Keynote Speaker, Thirteenth Annual San Joaquin County Diversity Luncheon. San Joaquin County, California. September 30, 2010.
116. "Becoming a Forensic Pathologist: My Experience and Perspective". Guest Lecturer, First and Second Year Medical Students, School of Medicine, University of California, Davis, October 22, 2010.
117. "Chronic Traumatic Encephalopathy in Sports". 2010 Advanced Team Physician Course, American College of Sports Medicine, American Medical Society for Sports Medicine and American Orthopaedic Society for Sports Medicine. Washington, DC, December 10, 2010.

118. "Emerging Technology in the Evaluation and Treatment of Concussion". 2010 Advanced Team Physician Course, American College of Sports Medicine, American Medical Society for Sports Medicine and American Orthopaedic Society for Sports Medicine. Washington, DC, December 10, 2010.
119. "Epidural Hemorrhages" Visiting Professor Lecture, Neurosurgery Residents, Department of Neurosurgery, West Virginia University, August 17, 2010
120. "Pharm Parties". 10th Annual San Joaquin County Child Abuse Prevention Symposium, Stockton, California, April 14, 2010.
121. "The Forensic Pathology of Chronic Traumatic Encephalopathy". 2010 Independent Retired Players Summit and Conference, Las Vegas, Nevada, April 17, 2010.
122. "Chronic Traumatic Encephalopathy". The Amen Clinic, Newport Beach, California, March 20, 2010.
123. "The forensic pathology of Chronic Traumatic Encephalopathy in American Athletes: the journey thus far." Advanced Education Seminar, Lakewood Orthopedics & Sports Medicine, Speakers Bureau Member, Dallas, Texas, January 23, 2010.
124. "Emerging Forensic Issues of Chronic Traumatic Encephalopathy in American Athletes". Presenter, 2009 National Educational Conference, American Association of Legal Nurse Consultants, Phoenix, Arizona, April 24, 2009.
125. "The stressors in the life of a physician and forensic pathologist". Sociology of Health & Illness Course, University of the Pacific, Stockton, California, March 26, 2009.
126. "New Technologies in Neuropathology and Neuropathology of Concussion in Athletes". Presenter, Emerging Technology and Techniques in Neurosurgery, Ceasar's Palace, Las Vegas, November 8, 2008, Departments of Neurosurgery, West Virginia University, Morgantown, WV, and Allegheny General Hospital, Pittsburgh, PA.
127. "The Forensic Pathology of Chronic Traumatic Encephalopathy in Professional American Athletes". Key Note Speaker, American Association of Legal Nurse Consultants, West Virginia, Upper Ohio Valley Chapter, 2008 meeting, October 17, 2008, Wheeling, West Virginia.
128. "The Pathophysiology of Traumatic Brain Injury". Visiting Professor/Guest Lecturer, October 1, 2008, Department of Neurosurgery, West Virginia University, Morgantown, West Virginia.
129. Key Note Speaker, "Helping People One Test at a Time", National Laboratory Week, Harlem Hospital Center, New York City, April 25, 2008

130. "The Link between the Field and Dementia" Rendezvous II: An International Sports Medicine Conference, March 25, 2008, Caesars Palace, Las Vegas. 17th Annual Meeting of The American Medical Society for Sports Medicine (AMSSM) and The Canadian Academy of Sports Medicine (CASM), March 25 – 29, 2008.
131. "The Neuropathology and Delayed Sequelae of Concussion in NFL Players". The National Concussion Summit: Concussion in Sports: The Under-Recognized Public Epidemic The Sports Concussion Institute. Centinela Freeman Regional Medical Center, Marina Campus, Marina Del Rey, California at The Marriott Hotel, 4100 Admiralty Way, Marin Del Rey, CA 90292, Friday, April 20th, 2007.
132. "Football Induced Chronic Traumatic Encephalopathy" November 2006, meeting of the Pittsburgh chapter of the National Association of Neurological Nurses, Waterfront, Homestead, Pittsburgh.
133. "The forensic perspectives of traumatic brain injury". 2005 Annual Nursing Conference: traumatic brain injury, from ER management to ICU, rehab, organ donation and Trisha Meili a.k.a. Central Park Jogger. Allegheny General Hospital Pittsburgh, Pennsylvania. November 18, 2005
134. 'Mortality following bariatric surgery'. Bariatric Surgery Research Mini-symposium, Minimally Invasive Surgery Center, Department of Surgery, University of Pittsburgh, Pennsylvania, January 17, 2004.
135. "My professional life as a forensic pathologist and neuropathologist". A career development presentation to selected high school students of the Pittsburgh Public School System. April 14, 2004.
136. "My professional life as a forensic pathologist and neuropathologist". A career development presentation to students of the Saint Benedict the Moor Catholic School, 2900 Bedford Avenue, Pittsburgh, Pennsylvania 15219. March 5, 2004.
137. 'The medico-legal autopsy'. University of Pittsburgh Chapter of the American Inns of Court, Pittsburgh, Pennsylvania. April, 2002.
138. 'My professional experience as a Forensic Pathologist'. Graduating Lecture, 2002 certificate program class, The Cyril H. Wecht Institute of Forensic Sciences, School of Law, Duquesne University, Pittsburgh, Pennsylvania. November, 2002.
139. "The mechanisms of trauma in motor vehicular accidents". Surgical grand-rounds, Department of Surgery, The Mercy Hospital System, Pittsburgh, Pennsylvania. May, 2000.

Post-Graduate Medical Teaching Experience-1

1. Supervised medical students during the Emergency Medicine rotation, University of Jos, Jos, Nigeria, January 1991-September, 1994.
2. Taught a patho-physiology course for the physician assistant program at the Harlem Hospital Center, New York, NY. July, 1996 – June, 1999.
3. Presented weekly clinico-pathologic conferences for the departments of pathology, surgery, internal medicine, obstetrics and gynecology, Harlem Hospital Center, New York, NY. July, 1995 – June, 1999.
4. Taught medical students and residents, forensic pathology and neuropathology, University of Pittsburgh, July, 1999 – June, 2002.
5. Taught a workshop in the patho-physiology course, Masters in Public Health program, Graduate School of Public Health, University of Pittsburgh, September, 2002 – 2007.
6. Supervised residents during rotation in forensic pathology, University of Pittsburgh, July, 2002 – 2007.
7. Taught monthly forensic neuropathology workshops to residents and fellows in pathology, neurology and neurosurgery, University of Pittsburgh, 2004 – 2007.
8. Taught monthly neuropathology workshops to residents in pathology, Conemaugh Memorial Hospital, Johnstown, Pennsylvania, January 2005 – 2007.
9. Presented monthly trauma rounds to surgery residents, Mercy Hospital of Pittsburgh, January 2006 – 2007.
10. Presented quarterly one-day introductory autopsy conferences for the emergency medicine technology program of Allegheny County Community College, April, 2006.
11. Forensic pathology and neuropathology grand round lectures, internal medicine, family practice and surgery residents, San Joaquin General Hospital, French Camp, California, 2009 – 2012.
12. Forensic neuropathology brain cutting workshops for pathology residents and fellows, University of California at Davis, Department of Pathology, 2009 – 2013.
13. Forensic neuropathology brain cutting workshops for neurology residents and fellows, University of Nevada, Las Vegas at the Clark County Coroner's Office, 2011 – 2012.
14. Mentoring and teaching residents and medical Students and covering the autopsy service, and forensic neuropathology service, Department of Medical Pathology and Laboratory Medicine, University of California at Davis, March 2012 – July 2013.

15. Microscopy sessions and slides review, residents and medical students, Department of Medical Pathology and Laboratory Medicine, University of California at Davis, September 2013 to present.
16. Grand rounds lectures, didactic lectures in laboratory management, forensic pathology and neuropathology for medical students, residents and fellows, Department of Medical Pathology and Laboratory Medicine, UC-Davis Medical School, 2008 – Present.
17. Grand Rounds, Department of Medical Pathology and Laboratory Medicine, UC-Davis, February 1, 2016: What a Pathologist can Learn from Hollywood: Dr. Omalu's Experience.
18. Brain Cutting Workshops and Signouts, Medical Students, Graduate Medical and Non-Medical Students, Residents and Fellows, Department of Medical Pathology and Laboratory Medicine, University of California- Davis Medical School. January 2018 – Present.

Research Grant

1. \$24, 750.00 grant from The Pittsburgh Foundation for a research project on Loss of heterozygosity as predictors of grade and outcome in meningiomas in collaboration with John Lee, M.D. University of Pittsburgh.
2. \$200,000.00 grant from The Hazel Ruby Mcquain Charitable Trust, West Virginia to the Brain Injury Research Institute, for research into Chronic Traumatic Encephalopathy, 2010-2011.

Boards and Committees Memberships

1. Child Death Review Board, San Joaquin County, California, 2007 – 2018
2. Infant Death Review Board, San Joaquin County, California, 2007 – 2018
3. Elder Death Review Board, San Joaquin County, California, 2007 – 2018
4. Homicide Review Committee, San Joaquin County, California, 2010 – 2015
5. San Joaquin County Trauma Audit Committee, San Joaquin County Emergency Medical Services Agency, California, 2014 – 2018
6. Member, Traumatic Brain Injury Advisory Board, State of California, 2018 - Present

Broadway Theatre and Hollywood Motion Picture Coverage

1. Concussion, drama film, Sony Pictures, starring Will Smith as Bennet Omalu. December 25, 2015. Written and directed by Peter Landsman, produced by Scott Free Productions and the Shuman Company.

PART 3: COURT TESTIMONIES

CRIMINAL CASES

NOTE: I began keeping records in June 2009. I do not have records from 1999 to 2009, a period of ten years.

1. The People of the State of California vs. Amera Khalid Addi. Superior Court of California, County of San Joaquin, California. Trial, June 4, 2009. LF010386.
2. The People of the State of California vs. Gerardo Antonio Orozco, Jose Jesus Gomez, Steven Mickey Alvarado. Superior Court of California, County of San Joaquin, California. Preliminary Hearing, June 8, 2009. SF111174.
3. The People of the State of California vs. Rammel Barao, Vandell Johnson, Jr. Superior Court of California, County of San Joaquin, California. Preliminary Hearing. May 28, 2009. SF111178.
4. The People of the State of California vs. Gabriel Isidore Olivarez, Ruben Carrillo. Superior Court of California, County of San Joaquin, California. Preliminary Hearing. June 24, 2009. SF111555.
5. The People of the State of California vs. Terrance Graham. Superior Court of California, County of San Joaquin, California. Preliminary Hearing. July 20, 2009. SF111544.
6. The People of the State of California vs. Melissa Huckabee. Superior Court of California, County of San Joaquin, California. Grand Jury. July 21, 2009. DA# 2535.
7. The People of the State of California vs. Chanreasmey Prum, Rattany Uy, Michael Andrew Garduno, Deandre Cole. Superior Court of California, County of San Joaquin, California. Trial. August 4, 2009. SF107288.
8. The People of the State of California vs. Raymond Lee Dale. Superior Court of California, County of San Joaquin, California. Preliminary Hearing. August 5, 2009. MM118508.
9. The People of the State of California vs. Anthony Santos Mejorado, Issac Joseph Mejorado. Superior Court of California, County of San Joaquin, California. Preliminary Hearing. August 25, 2009. SF111696.
10. The People of the State of California vs. Daniel Seth Maciel, Jaime Ledezma Baro, Travis Leon Carter, Debbie Rosemarie Perez, Roy Allen Thierry. Superior Court of California, County of San Joaquin, California. Trial. September 18, 2009. SF105792.
11. The People of the State of California vs. Dejon Whitfield, Djuane Hicks, Edward Adams. Superior Court of California, County of San Joaquin, California. Grand Jury. September 23, 2009. DA# 2550.

12. The People of the State of California vs. Jesse Refugio Tellez. Superior Court of California, County of San Joaquin, California. Preliminary Hearing. October 15, 2009. SF112270.
13. The People of the State of California vs. Sidney Kelley, David Depron, Erica Crystal Vergara, Amanda Nicole Newitt. Superior Court of California, County of San Joaquin, California. Preliminary Hearing. October 20, 2009. SF107969.
14. The People of the State of California vs. Terry Lynn Herron. Superior Court of California, County of San Joaquin, California. Preliminary Hearing. October 28, 2009. SF112494.
15. The People of the State of California vs. Mario Pena. Superior Court of California, County of San Joaquin, California. Trial. November 4, 2009. MF031224.
16. The People of the State of California vs. Jorge Morgan, Robert Anthony Plunkett-Morgan. Superior Court of California, County of San Joaquin, California. Preliminary Hearing. November 19, 2009. SF112590.
17. The People of the State of California vs. Jeffrey Haworth. Superior Court of California, County of San Joaquin, California. Trial. January 5, 2010. SF112033.
18. The People of the State of California vs. Joel Ladon Lewis, Gerell Lee Whatley, Delisa Rochelle Bryant. Superior Court of California, County of San Joaquin, California. Trial. January 22, 2010. SF110732.
19. The People of the State of California vs. Verra Torres. Superior Court of California, County of San Joaquin, California. Grand Jury. January 27, 2010. DA# 2571.
20. The People of the State of California vs. Richard Tihomir Lukic. Superior Court of California, County of San Joaquin, California. Preliminary Hearing. February 3, 2010. SF113247.
21. The People of the State of California vs. Gabriel Isidore Olivarez, Ruben Carrillo. Superior Court of California, County of San Joaquin, California. Trial. February 18, 2010. SF111555.
22. The People of the State of California vs. Jose Jesus Perez, Jose Gutierrez. Superior Court of California, County of San Joaquin. Preliminary Hearing. February 19, 2010. SF113004.
23. The State of Nevada vs. Victor Olusegun Fakoya. Clark County District Court, Nevada. Trial. February 24, 2010. 08F22346X/C249790.
24. The People of the State of California vs. Anthony Adell Hubbard. Superior Court of California, County of San Joaquin. Preliminary Hearing. March 2, 3, 2010. SF113328.

25. The People of the State of California vs. Gerardo Antonio Orozco, Jose Jesus Gomez, Steven Mickey Alvarado. Superior Court of California, County of San Joaquin. Trial. March 10, 2010. SF111174.
26. Commonwealth of Virginia vs. Elmer Jonathan Midence. Circuit Court of Fairfax County, Virginia. Trial. March 11, 2010. FE-2009-0000914.
27. The People of the State of California vs. Ghanem Valdimar Elsumeri. Superior Court of California, County of San Joaquin, California. Preliminary Hearing. March 23, 2010. SF113429.
28. The People of the State of California vs. Michael Dwayne Mau, Johnny Joseph Martinez, Elvis Mendoza, Cecilia Naomi Colon, Maria De La Luz Martinez. Superior Court of California, County of San Joaquin, California. Preliminary Hearing. March 28, 2010. SF113131.
29. The People of the State of California vs. Leopoldo Carranza. Superior Court of California, County of San Joaquin, California. Preliminary Hearing. March 28, 2010. SF113697.
30. The People of the State of California vs. Baljit Singh. Superior Court of California, County of San Joaquin, California. Preliminary Hearing. April 7, 2010. SF113711.
31. The People of the State of California vs. Antonio Perez Ford. Superior Court of California, County of San Joaquin, California. Trial. May 12, 2010. SF106558.
32. The People of the State of California vs. James Washington. Superior Court of California, County of Sacramento, California. Trial. May 18, 2010. 08F04720.
33. The People of the State of California vs. Jose Rodriguez Cardenas, Ramon Enriquez Mendez. Superior Court of California, County of San Joaquin, California. Trial. May 20, 2010. SF106859.
34. The People of the State of California vs. Arthur Carlos Garcia. Superior Court of California, County of San Joaquin, California. Trial. May 26, 2010. SF107299.
35. The People of the State of California vs. Junior Barrasa. Superior Court of California, County of San Joaquin, California. Preliminary Hearing. June 2, 2010. SF113295.
36. The People of the State of California vs. Percy Lamonte Camel. Superior Court of California, County of San Joaquin, California. Preliminary Hearing. June 8, 2010. SF114327.
